WHO I AM

I'm a software developer who writes backend systems that actually work in production. With 11 months of experience at Indus Analytics, I've built real modules inside **Thomson ERP** — procurement, inventory, approvals, maintenance — and deployed live projects using cloud databases. I use AI tools daily to write better SQL, automate workflows, and ship faster. I learn quickly, take ownership, and don't need hand-holding. Ready to relocate.

EXPERIENCE

Indus Analytics — *Indore, MP*

Software Developer — *Jun 2024 – Present (11 Months)*

- **Thomson ERP Development** — built Purchase Order, Purchase Requisition, GRN, Gate Entry, AMC tracking, CAPEX budget, and Supplier Rating modules from scratch
- **AI-Based Parcel Delivery Automation** — integrated rider tracking, Google Maps API, distance calculation, and automated email alerts into a live delivery workflow
- Designed and optimized **MS SQL stored procedures, triggers, and complex joins** for large datasets with strict data consistency
- Built **FastReport templates** for printable ERP reports used by operations team daily
- Deployed projects on **Vercel & Somee**; worked with cloud databases (Railway DB, PlanetScale)
- Used **AI tools (ChatGPT, Copilot, Gemini)** daily for SQL query optimization, documentation, and workflow automation
- Improved UI/UX, validations, and workflow efficiency across multiple ERP modules
- Handled **multi-level approval workflows** and real-time production issue resolution

TECHNICAL SKILLS

ERP: Thomson ERP — Procurement, Inventory, Maintenance, Approvals

Backend: VB.NET, Java, Python, APIs, Email Automation, Google Maps API

Frontend: HTML5, CSS3, Bootstrap, Responsive UI, JavaScript

Database: MS SQL Server — Stored Procedures, Triggers, Joins, Query Optimization

Cloud: Vercel, Somee, GitHub Pages, Railway DB, PlanetScale

AI Tools: ChatGPT, GitHub Copilot, Gemini, Grok AI, Microsoft Copilot

Tools: Visual Studio 2022/2025, SSMS, FastReport Designer, Git, Postman

CS Core: DSA (C), OS, DBMS, Software Engineering

PROJECTS

AI-Based Parcel Delivery Automation System — *VB.NET, Google Maps API, SQL, Email Automation*

- Live rider tracking with real-time distance calculation using Google Maps API
- Automated email notifications triggered by delivery status updates
- AI-assisted workflow logic for smart assignment and routing

Thomson ERP — Full Module Suite — *VB.NET, MS SQL Server, FastReport*

- End-to-end procurement lifecycle: PR → PO → GRN → Gate Entry with complete audit trail
- CAPEX budget monitoring (allocation vs utilization), AMC scheduling, Supplier Rating engine
- Multi-unit inventory management with inter-location stock transfer support

Cloud Deployments — *Vercel, Somee, Railway DB, PlanetScale*

- Hosted web applications on Vercel and Somee with cloud database integrations
- Worked with API-based architecture for scalable, remote-accessible deployments

EDUCATION

MCA — IPS Academy, Indore	*2023–2025 | CGPA: 8.20*
B.Sc. Computer Science — Barkatullah University	*2020–2023 | 63.27%*
12th — MP Board	*69.60%*
10th — MP Board	*72.20%*

CERTIFICATIONS

Java (Basic + Advanced) • C Programming • C++ Programming

WHAT I BRING TO YOUR TEAM

- I have **built and shipped real ERP modules** — not just tutorials, actual production code
- I use **AI tools every day** to move faster — better SQL, smarter logic, cleaner docs
- I have worked with **Thomson ERP** end-to-end — rare skill, especially at junior level
- **Open to relocation** anywhere in India — no delays, no excuses
- I learn fast, take ownership, and ask the right questions — not someone you need to manage
